EXPERIENCE

Datto (Formerly Backupify)
Software Engineering Intern

Boston, MA
May - August 2015

- Member of Scrum team of 4 engineers responsible for maintaining and enhancing Google Apps and Salesforce backup products.
- Proven and successful adaptation to challenges associated with an unfamiliar technology stack, process, and scale of deployment.

Medisked, LLC
Software Development Contractor

Rochester, NY
May 2014 - May 2015

- Lead the design, development, deployment, and integration (to Connect platform) of the below mentioned eMAR product.
- Continually enhanced Connect and eMAR platforms through collaborations with internal product and project managers, leading to the successful delivery of business critical functionality and relevant analytics.

Software Development Intern

May 2013 - January 2014

- Sole developer of 'Next-Gen. UI' project, implementing a new web interface for Medisked Connect; an enterprise grade health care platform, according to proposed UI mockups.
- Consulted and shadowed I/DD health care professionals during a series of discovery sessions, eliciting the functional requirements of industry-compliant eMAR product.

Rediker Software
Software Development Intern

Hampden, MA
May - August 2012

- Assessed industry need for Teacher Evaluator platform alongside K-12 Education partners and team of 4 interns.
- Contributed system specification and design input to team during early phases of development
- Ownership of dashboard analytics feature as well as shared responsibility over key application features.
